Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This Office action is responsive to applicant's preliminary amendment filed October 10, 2003. Claims 1, 8, 13 and 20 are pending.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 13 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 13 recites "[a]n article of manufacture comprising a *program storage* medium ..." (emphasis added) Functional descriptive material comprising computer programs or algorithms that impart functionality when employed as a computer component must be embodied on a *computer readable* medium (see MPEP 2106.IV.B1 (a)).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 8 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,016,027 (Uebbing).

Regarding claim 1, Uebbing teaches an image capture device, comprising: an illumination source (LED printhead (column 8, lines 43-47)); a thermal model of said illumination source that determines a temperature of said illumination source (column 8, lines 50-53); a light output model of said illumination source that determines a light output of said illumination source from said temperature (column 8, lines 53-57); and an exposure adjustment that is changed to compensate for changes in said illumination source as indicated by said model output (column 8, lines 57-68). Claims 8 and 20 recite similar limitations to those of claim 1 and are thus rejected as well.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2624

7. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Uebbing.

Claim 13 recites an article of manufacture comprising a program storage medium having computer readable program code means for performing the steps corresponding to the limitations recited in above-rejected claims 1, 8 and 20. Although such a program storage medium is not taught by Uebbing, it is well known in the art to provide a program storage medium for performing processing steps in general, so that the processing steps may be performed by a computer as an alternative to specific hardware required for performing the processing steps, and thus it would have been obvious for one of ordinary skill in the art to provide a computer program for performing the steps disclosed by Uebbing.
